Contents Alexa Support

Note: After you enable the Amazon Alexa Access service for your device, your device can be remotely controlled through the Tuya Smart or Smart Life App and can be connected to voice speakers such as Amazon Echo, using a skill. If your device needs to be connected to voice speakers such as Amazon Echo through an OEM App, ensure that the OEM App has obtained dedicated skills.

1 Device Support

1.0.1 Firstly, please check the device whether to support the Alexa, as shown below, in the Products--Smart Products, you could confirm it.

Figure 1: 1.png

1.0.2 If your device doesn't support it, you could click the Value-added Services — Smart Speaker to apply the Alexa Access function.

Figure 2: 11.png
