## 1 Service Introduction

Widget access for your OEM App allows you to control devices quickly without having to open the App, improving product use efficiency.

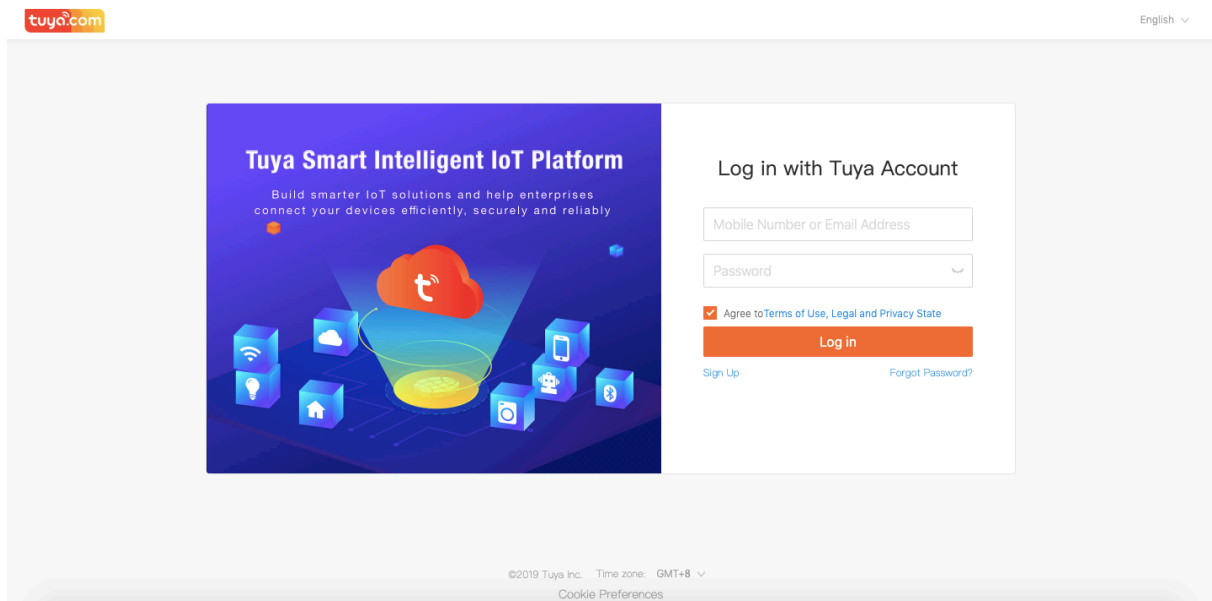

Note: A widget is an App extension that can display shortcuts for your App's devices or scenarios in the iPhone **Notification Center** or on the home screen of Android smartphones.

**If you purchase the Widget Access service through an Android smartphone, Tuya can enable the service for your App directly. If you purchase the Widget Access service through an iPhone, log in to the Apple developer platform, configure the widget function, download the widget mobileprovision file, and send it to Tuya personnel to enable the service. For details on how to configure the widget function, see [iOS Widget Configuration](#).**

## 2 Service Subscription Process

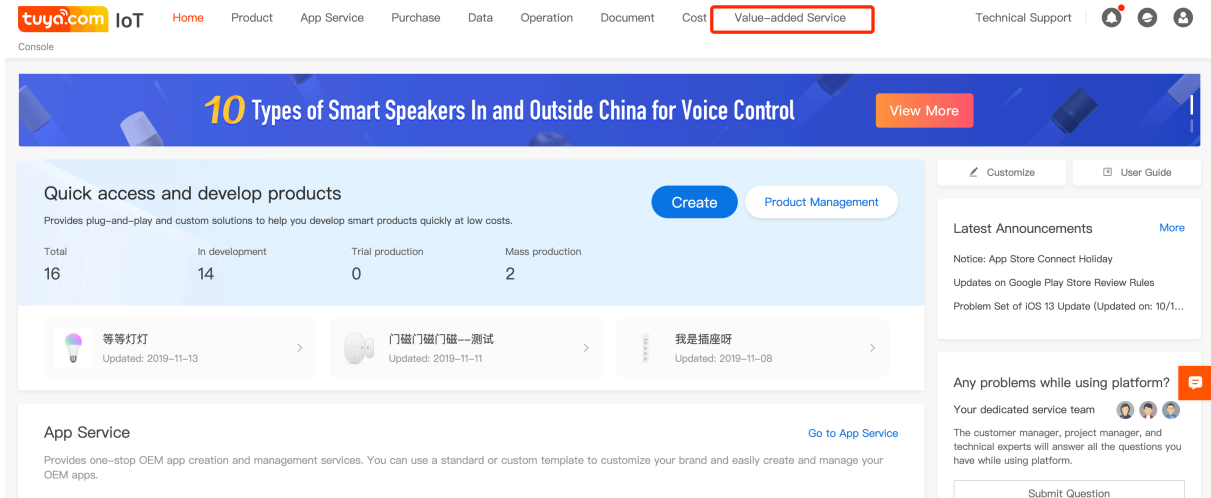

### 2.1 Step 1: Logging In to the Tuya Smart Platform

Open the Tuya Smart platform login page <https://auth.tuya.com>. If you have an account, log in with the account. If you do not have an account, click **Sign Up** to register for an account and then log in.

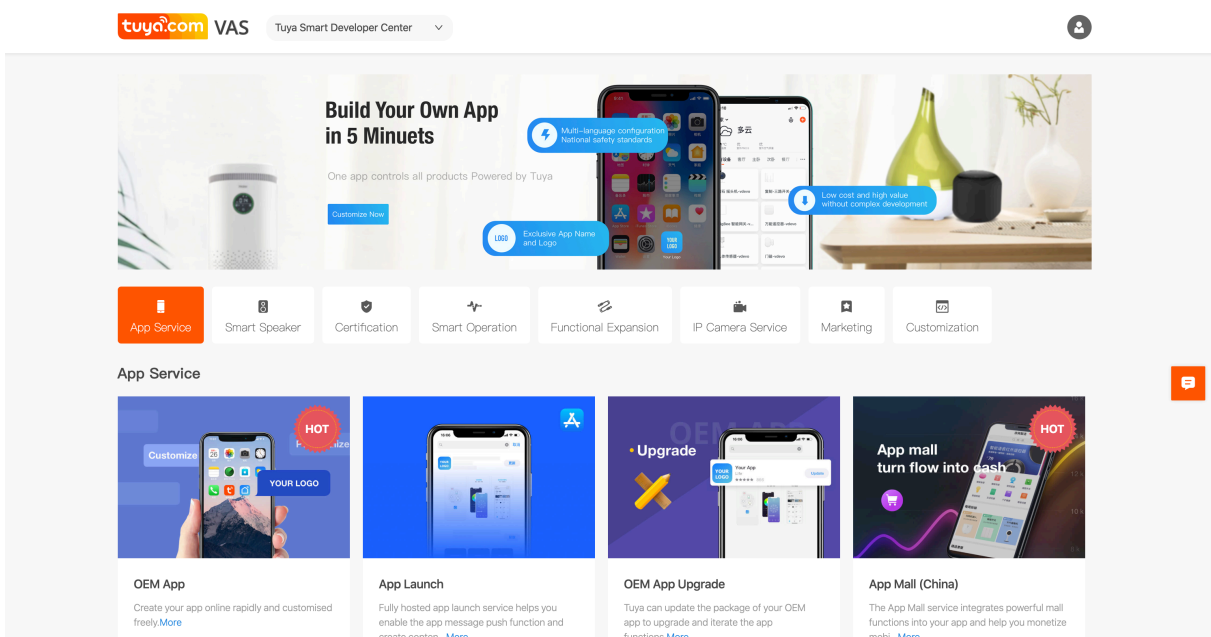

### 2.2 Step 2: Opening the Value-added Service Page

Click **Value-added Service** on the top of the homepage to open the **Value-added Service** page.

### Widget Access

**Service order information**

\* Please select the APP:

Service Description: 1.After widget access is enabled for your app, you can control devices and scenarios with one click without opening the app. Currently, the iOS system and the Android system do not currently support the use of the Widget function by the Bluetooth device.  
 2.After you pay for the service, Tuya can complete access and testing within three to five workdays. Tuya will then apply to release your app updates, and the release time is subject to the App Store's or Google Play's review, which requires about one week.  
 3. The implementation of this service is based on the fact that your OEM App is the official version of the App.  
 4.To enable widget access for multiple OEM apps, purchase the service for the apps separately.

### 2.5 Step 5: Selecting a Payment Method

Select a payment method on the **Paypal** tab page.

## 3 FAQs

### 3.1 Is the Widget Access Service Enabled by PID or App?

The Widget Access service is enabled by App.

### 3.2 What Are the Prerequisites for Enabling the Widget Access Service?

You have your own OEM App.

### 3.3 Can I Continuously Update Widget Functions for Free?

Widget functions are iterated with App version updates. Use Tuya's official template to upgrade your App to the latest version. Tuya will iterate the widget functions for your App for free.

### 3.4 What Is the Relationship Between Controllable DPs in Widget and Device Shortcut Switch DPs Under Quick toggle settings on the Tuya Smart Platform?

Device shortcut switch DPs under Quick toggle settings on the Tuya Smart platform are desktop-level, whereas controllable DPs in widget are within an App. You can set DPs on the Tuya Smart platform and control them in the App.

### 3.5 What Devices Can I Use the Widget Access Service to Control?

Devices with an ON/OFF switch can use the Widget Access service. The service only supports the ON and OFF actions.
