1 Overview

After hardware debugging of a product is completed, the product enters the mass production phase. You need to change the product status to enable online purchase of trial modules and mass production modules.

2 Procedure

Step 1: Log in to the Tuya Smart platform, click Product, and select a product to configure. On the displayed page, click Mass Production 5.

Step 2: Click Complete development in the Developing area.

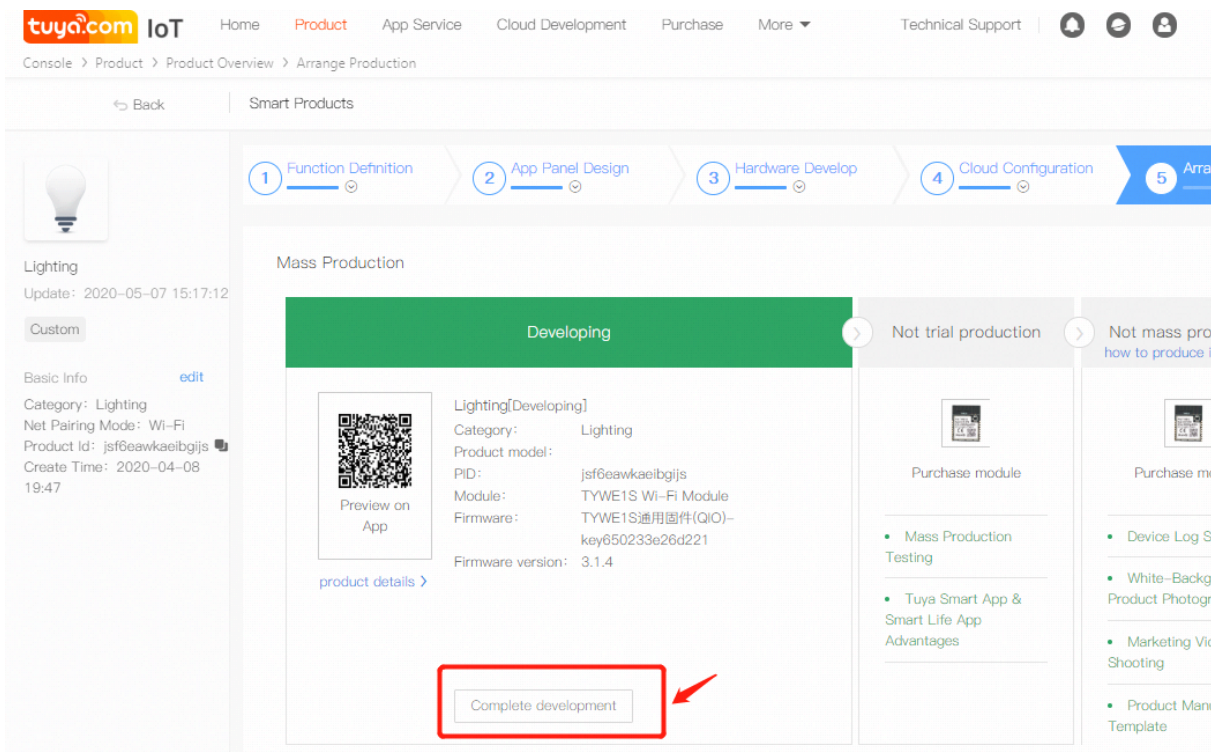

Figure 2: image.png

Step 3: In the displayed dialog box, click Complete development. The product status

is changed to Trial-production.
