| 3 | OEM App Support | 10 |
| 4 | More service | 11 |

Contents

- Version: V3.17.6
- Release date: 2020-5-12

1 New

1.1 Supported the additional automation conditions regarding to sunrise and sunset

- Before, we were only able to set a period of time after sunrise or sunset to trigger an automation, now App added pre-sunrise and pre-sunset time conditions.

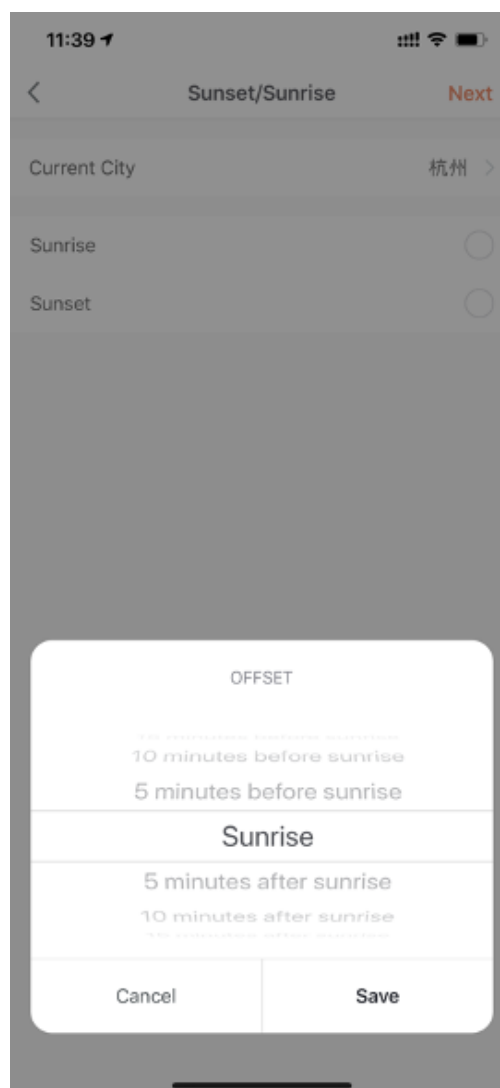

Figure 1: img

1.2 Supported the Google Assistant quick connect

- Users can find Google Action via App to bind without searching on Google Home or Google Assistant, where makes authorization process easier and increases user experience.

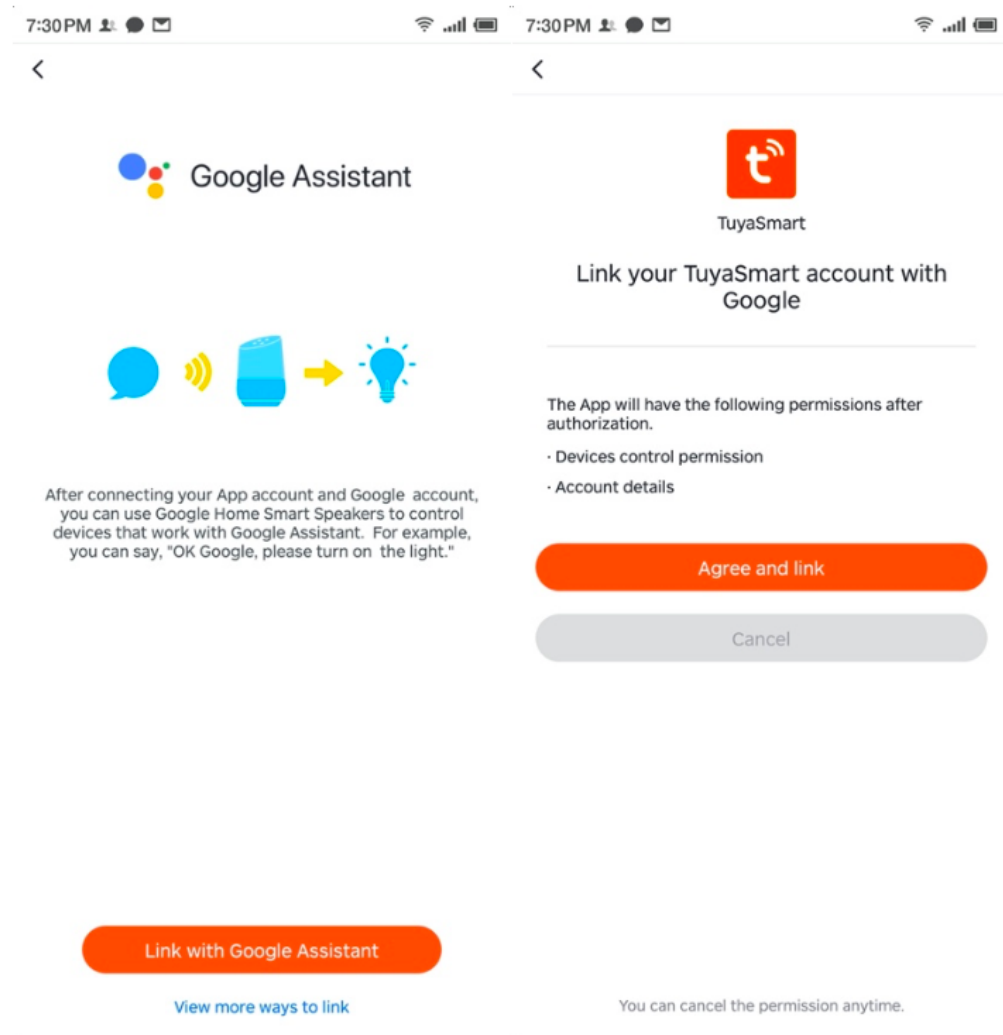

Figure 2: img

1.3 Alert message added home tag

- Messages from all homes in the message center are mixed together and it is difficult to visually distinguish which home the message comes from.

- So App show home information for alert notifications with a consistent format of three types of messages

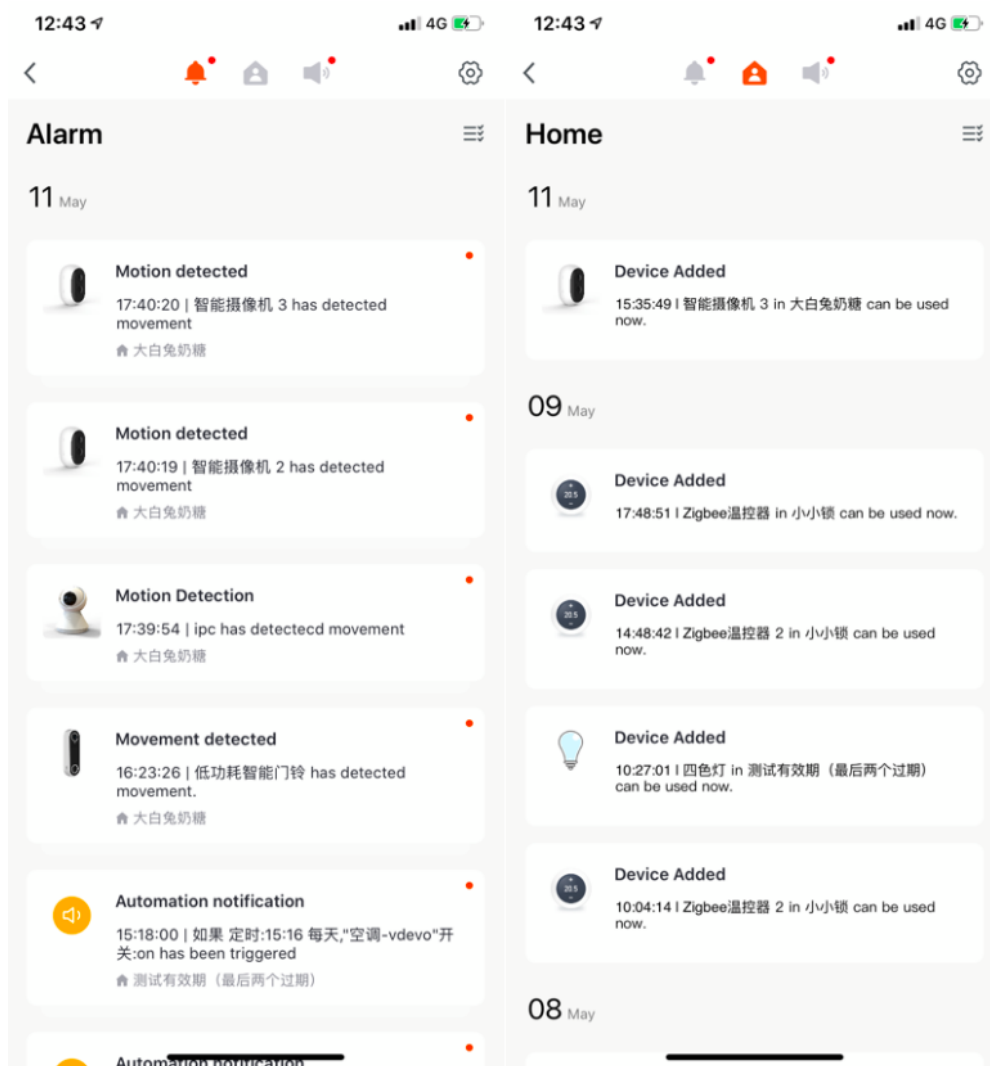

Figure 3: img

1.4 Supported the beginner's guide of creating a Smart

- The beginner's guide banner will show up for App v3.17.6 and above for the first time that a user opens the Smart page.

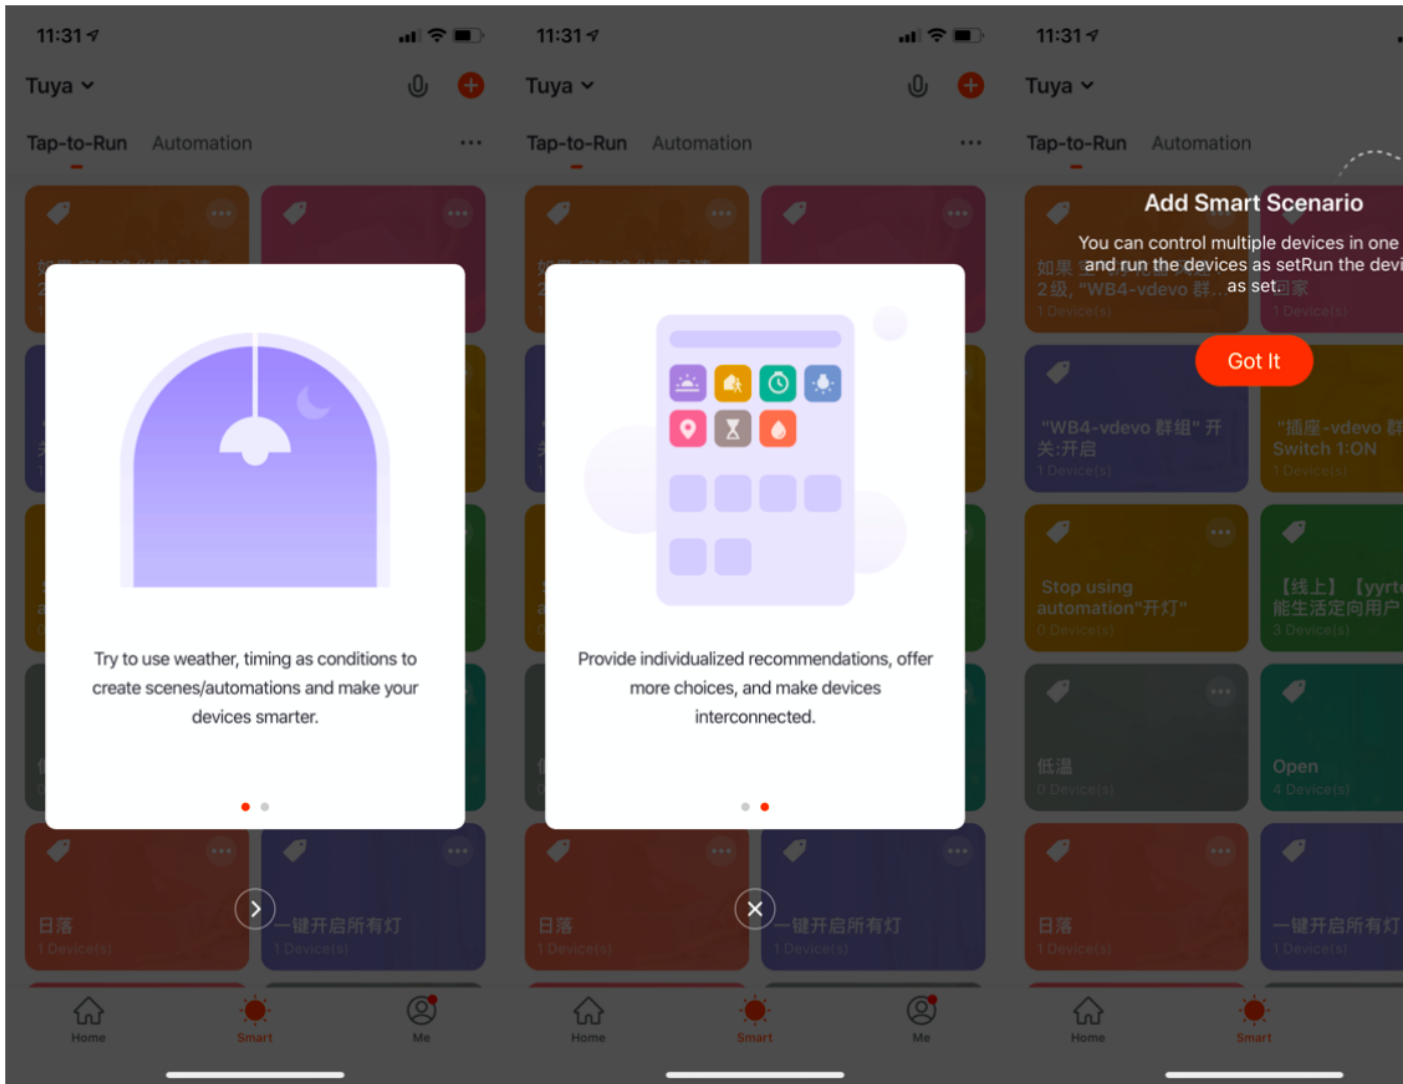

Figure 4: img

1.5 Added the Account deactivation message

- If the user who deactivated the account reactivated it within 7 days, a message will show on the home page saying that your request of deleting the account is not approved.

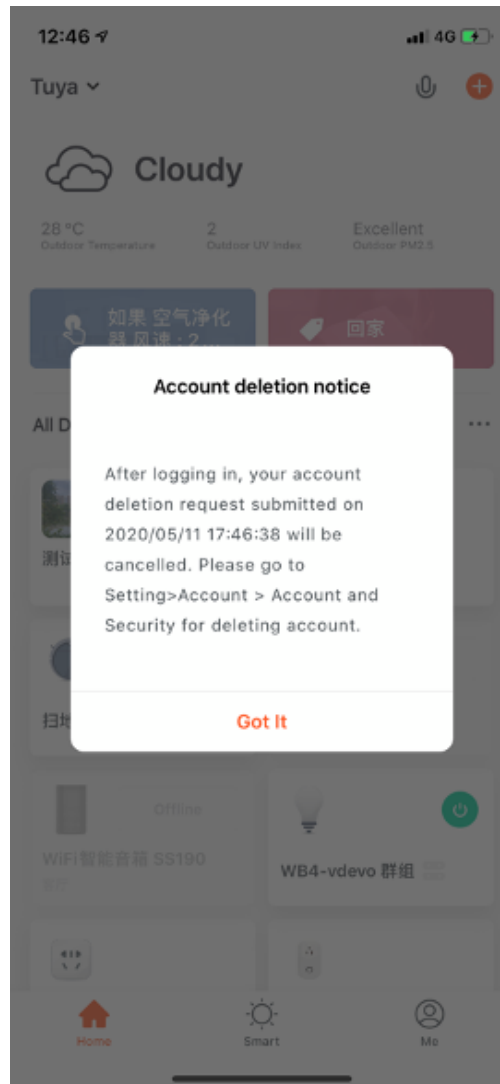

Figure 5: img

1.6 Supported inviting unregistered users to enter a home by an invitation code

- Invite unregistered users to join a home via a third-party app by sharing an invitation code. Lower the threshold for first-time use by unregistered users

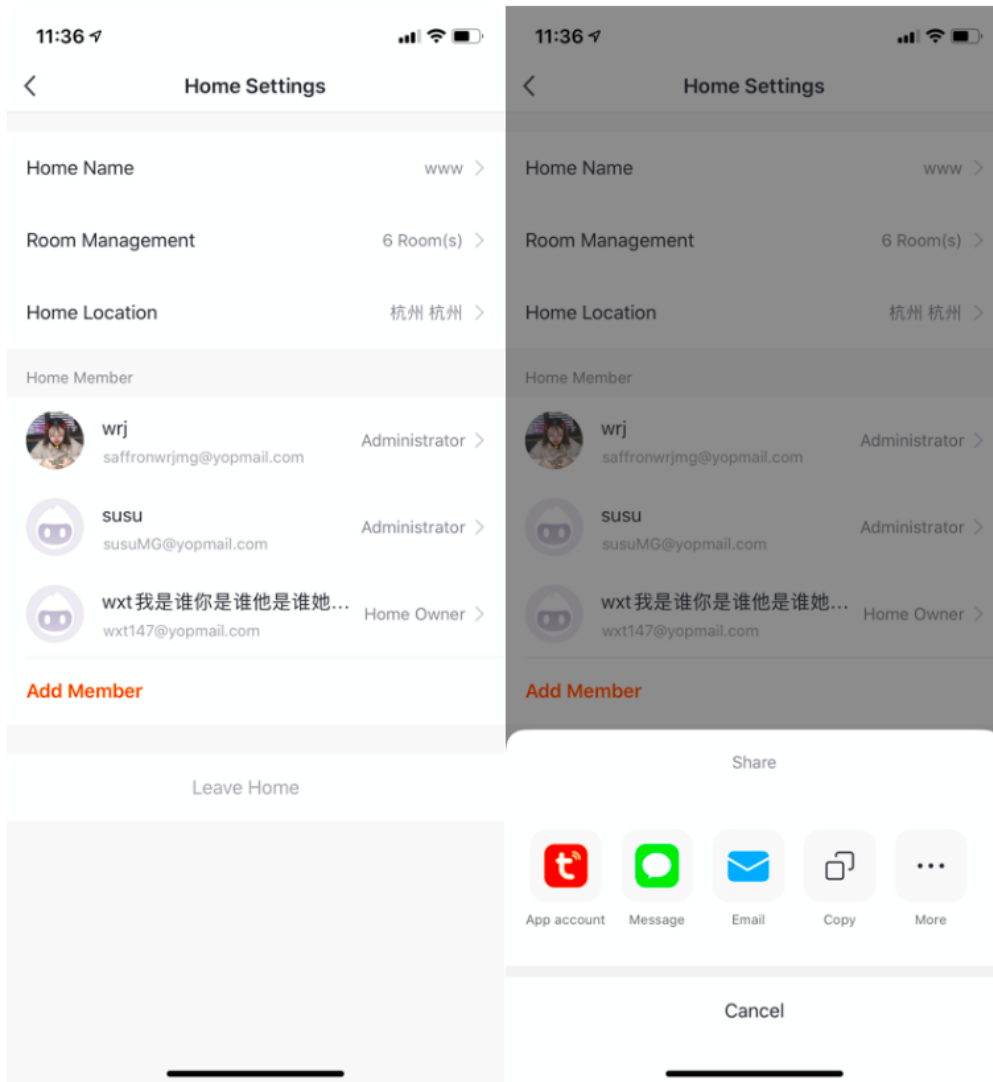

Figure 6: img

2 Improvement

2.1 Optimized the pairing process

- To get low success rate of pairing and poor visual and interactive experience, we optimized the pairing process.

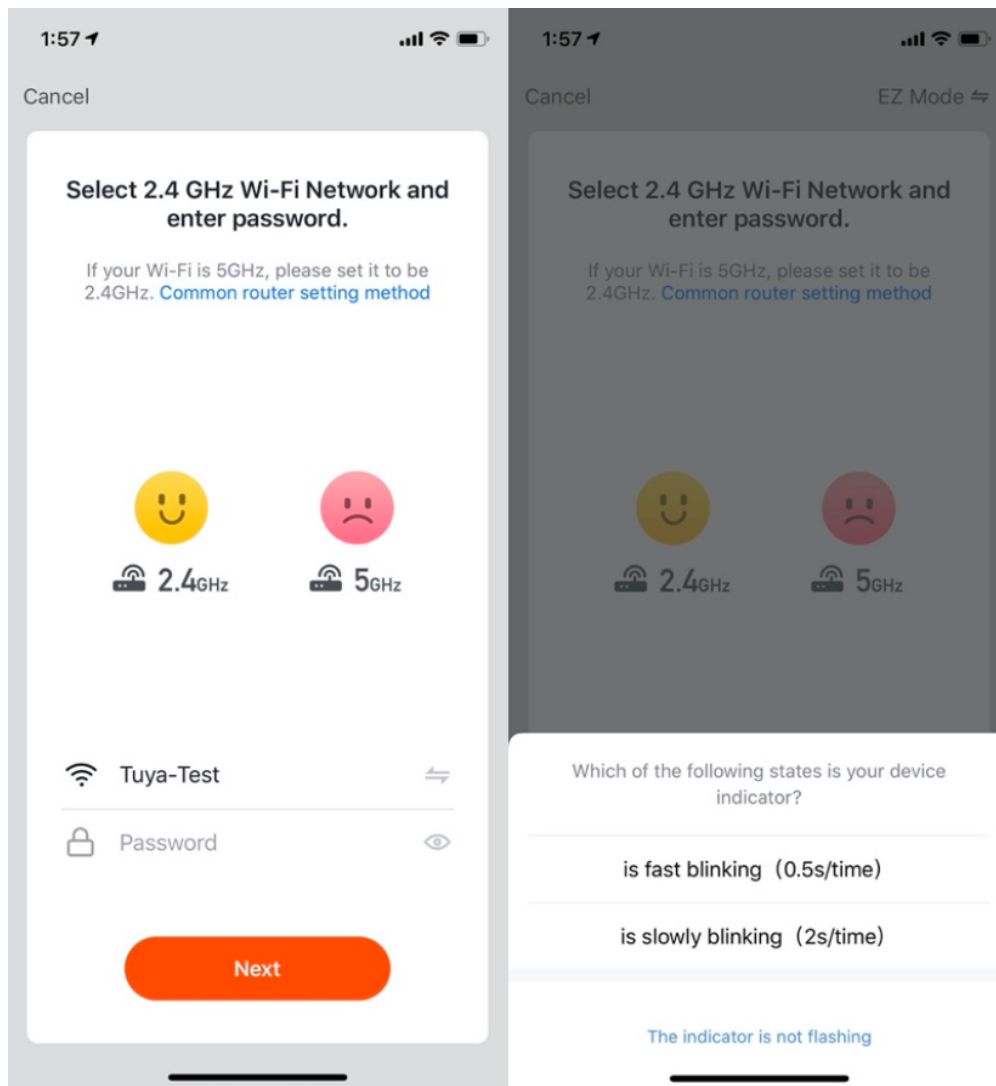

Figure 7: img

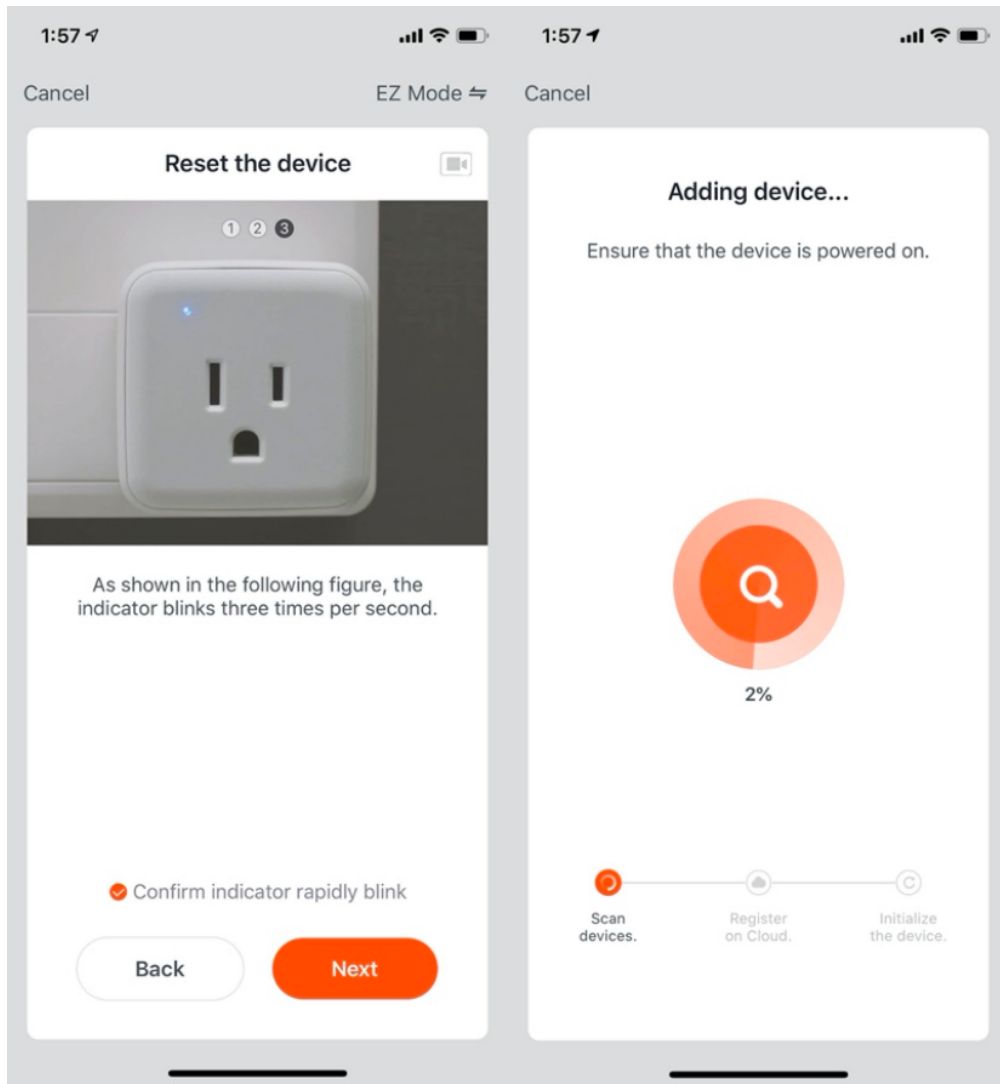

Figure 8: img

3 OEM App Support

Among the above functions, temporarily unsupported features are:

- Supported the beginner's guide of creating a Smart.
- Added the Account deactivation message

4 More service
