After the debut on Tuya 2020 AI+IoT Business Conference, Tuya Cloud Development Platform has finished the beta test and has been officially launched on July 16, 2020. Through Cloud Development Platform, Tuya Smart will work with global ecological partners to build an AIoT developer ecosystem in the world.

benefits

1. **Have the permission to call cloud API operations**, including management of authorization, users, network configuration, common devices, timing, device control, and the whole house.
2. **Subscribe device messages.** A message is sent when the device status is changed, the device goes online or offline, the device name or data point name is changed, or the device is added, deleted or upgraded.
3. **Associate the device with Cloud Development Platform.** After successful association, you can obtain the control and management permission of these devices.
4. **View the statistical data of the API requests and device messages.**

1 Free trial

1. If you have enabled the Cloud Development Platform service before it was officially launched on July 16, 2020, you will get **1-year free trial**. The free trial period is from July 16, 2020 to July 15, 2021.
2. If you enable the Cloud Development Platform service after it was officially launched on July 16, 2020, you can apply for **3-month free trial**. The free trial period starts from the application time.

2 Fare policy

- During or after the free trial period, you can pay and activate 1-year cloud development membership.
- Annual membership fee is as follows:

Payment currency	Annual membership fee	Free quota
RMB	2000/year	API requests: 10 million API requests/month Messages: 50 million messages/month
USD	300/year	API requests: 10 million API requests/month Messages: 50 million messages/month

- In case of exceeding the free quota, the fare policy is as follows. Pricing differs depending on the cost of 6 data centers.

Data center	Pricing of excessive part
Data center inside mainland China	API requests: ¥ 10/1 million API requests Message: ¥ 2/1 million messages
Data center outside mainland China	API requests: API requests: \$ 2.2/1 million API requests Message: \$ 0.8/1 million messages

Note:

- You can enjoy the same benefits during the free trial period and membership period.
- The free quota is calculated uniformly no matter which data center of Tuya is

requested in the world.

- In case of exceeding the free quota, the excess part is billed depending on the data center that you request. At present, the price is different for data centers inside mainland China and outside mainland China.

3 FAQ

Q: Where is the entry for Cloud Development Platform?

A: Log in to [Tuya IoT Console](#), and click Cloud Development tab on the top of the console to enter Tuya Cloud Development Platform.

Q: What happens if the free trial period expires or the membership expires?

A: After the free trial period expires or the membership expires, you cannot continue to use the relevant open capabilities of Cloud Development Platform. For example, you cannot request API operations or receive device messages.

Q: If I activate the membership during free trial period, how will the membership period be calculated?

A: The remaining days of the free trial period will be added to the membership period. For example, you get a 3-month free trial period on August 1, 2020, and then activate a 1-year official membership on September 1, 2020. The remaining 2-month free trial period is added to the 1-year membership, so the overdue date of membership is October 31, 2021.

Q: What about the product iteration plan of Cloud Development Platform in the future?

A: Tuya Cloud Development Platform will open up PaaS capability of more vertical industries in the future, and set up a SaaS application store to join hands with developers in building an ecosystem.
